## PROCESS.AUDIO RELEASES SPICERACK

New York, October 12, 2022

PROCESS.AUDIO, a software division of PureMix.net, is pleased to announce the release of their new pro audio plugin 'Spicerack'.

Dreamt-up, designed, and finely-tuned by award-winning engineers, **Spicerack** **reimagines the conventional approach to audio saturation and distortion**, elevating the process to new heights of creativity.

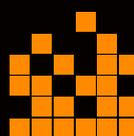

Drive

Tube

Amp

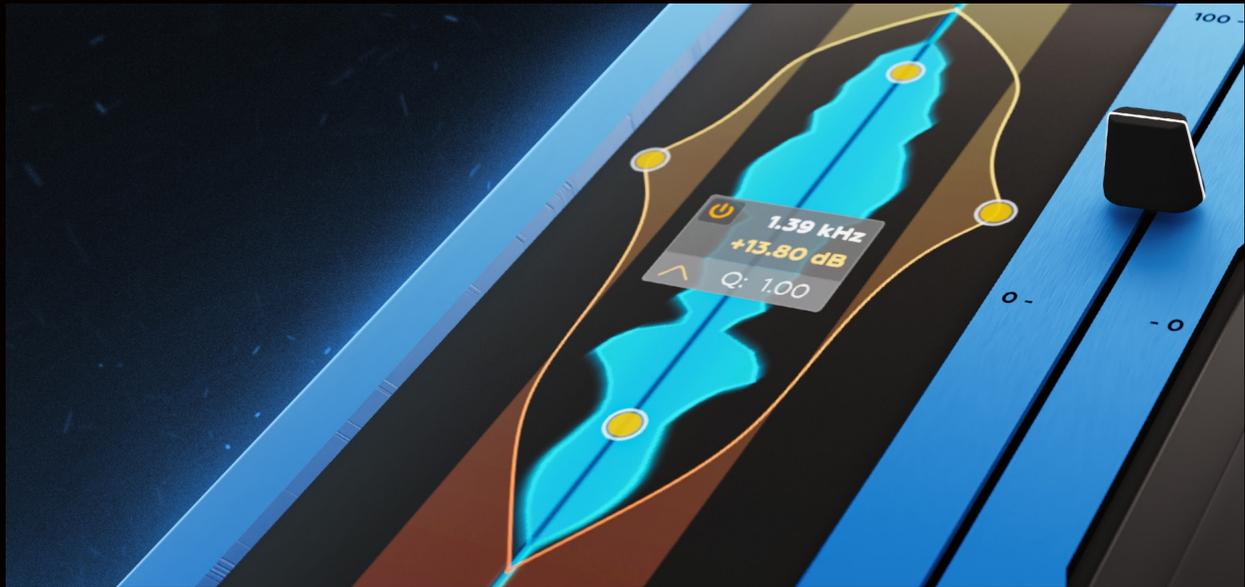

Lo-Fi

Fuzz

Spicerack features **five completely different flavors of harmonic distortion** to saturate, distort, shape or texturize your sounds. Those five algorithms have been carefully developed and tuned to provide a wide color palette that is truly useful for every producer and mixing engineer. In that respect, Spicerack picks up where other saturation plugins left off.

Using the **true linear phase technology** developed for PROCESS.AUDIO's ubiquitous first plugin 'Sugar', Spicerack yields unprecedented results when blending wet and dry signals, making no compromise on the quality of your audio material, a first for parallel saturation plugins.

Spicerack's interface was designed to dial-in the right amount of saturation as fast as possible with minimum brain share. The unique **Auto Gain Compensation and Calibration features** make for a smooth Drive knob ranging from subtle saturation to aggressive distortion with no level jumps.

Other Spicerack key features include **Console Remote**, a unique protocol allowing inter-plugin communication and remote control, and a **very creative audio Gate circuit** that helps morph Spicerack's distortion effects from conventional all out chaos to precise sound design tools.

## SPICERACK'S KEY FEATURES

- 5 mastering grade, phase accurate distortion algorithms
- Low CPU consumption
- Auto gain compensation for perfect gain staging
- Intuitive vertical linear phase EQ
- Console Remote interface to control all instances from one single instance
- Gate control on the distorted signal path

Spicerack is available now for Mac and Windows computers for **\$149** from the PROCESS.AUDIO website. Download a **free 30-day trial** and experience this fresh take on saturation for yourself.
